

Water System Study Committee
Charge to the Committee
Approved 11.18.2014

The committee will be comprised of three voting members: one water/sewer commissioner and two members of the public. The committee's charge is as follows:

Investigate and evaluate the advisability of development of an alternate source of water to serve the town center water district:

Identify and investigate potential options for providing an alternate water source to supplement the current wells, including but not limited to development of an alternate public water supply and/or connection to the Devens system. Evaluate the costs and benefits of each potential option(s); and

Make an initial report to the Selectmen no later than the 2015 Annual Town Meeting. Provided the initial report indicates that further investigation is warranted, make a final report with recommendation of a course of action to the Selectmen prior to the 2016 Annual Town Meeting.
