I move that the Town amend Chapter 125 of the Code of the Town of Harvard, the Protective Bylaw, by making the revisions to Section 125-56 thereof relative the Groundwater Protection Overlay District as printed on your blue handout for the 2019 Annual Town Meeting.

A friendly amendment was offered by Bruce Leicher, 58 Warren Avenue to add as (13) to **G. Prohibited Uses**, the wording, "Artificial turf fields".

The Planning Board accepted the friendly amendment.

The Moderator, on the advice of Town Counsel, ruled that the friendly amendment is outside of the scope of the article.

The Planning Board, on the advice of Town Counsel, reversed their acceptance of the friendly amendment.

The amendment was again offered by Bruce Leicher, 58 Warren Avenue and seconded to add as (13) to **G. Prohibited Uses**, the wording “Artificial turf fields”.

The amendment was voted majority no.

### G. Review Standards

The applicant shall demonstrate that the following measures are employed in development of the site:

- (1) Clearing for utility trenching shall be limited to the minimum area necessary to maneuver a backhoe or other construction equipment. Roots should be cut cleanly rather than pulled or ripped out during utility trenching. Tunneling for utilities installation should be utilized wherever feasible to protect root systems of trees;
- (2) Sites shall be designed in such a way as to avoid impacts to rare and endangered species and their habitat on a site, and to maintain contiguous forested areas to the extent practicable; and
- (3) In the design of a site, priority shall be given to retention of existing stands of trees, trees at site perimeter, contiguous vegetation with adjacent sites (particularly existing sites protected through conservation restrictions), and specimen trees.

#### **H. Permits and Conditions**

- (1) Erosion Control Permit and approved plans shall be posted at the work site over the duration of site disturbance, construction, and post-construction cleanup;
- (2) No activities shall commence without receiving and complying with an Erosion Control permit issued pursuant to this Section;
- (3) Understory vegetation beneath the drip line of preserved trees shall also be retained in an undisturbed state. During clearing and/or construction activities, all vegetation to be retained shall be surrounded by temporary protective fencing or other measures before any clearing or grading occurs, and maintained until all construction work is completed and the site is cleaned up. Barriers shall be large enough to encompass the essential root zone of all vegetation to be protected. All vegetation within the protective fencing shall be retained in an undisturbed state;
- (4) Development envelopes for structures, driveways, wastewater disposal, lawn areas, and utility work shall be designated to limit clearing and grading;
- (5) Other efforts to minimize the clearing and grading on a site associated with construction activities shall be employed, such as parking of construction vehicles, offices/trailers, stockpiling of equipment/materials, etc. in areas already planned for permanent structures. Topsoil, gravel, or other construction or landscaping materials shall not be stockpiled in areas of protected trees, wetlands, and/or their vegetated buffers;
- (6) Finished grades should be limited to no greater than a 2:1 slope, while preserving, matching, or blending with the natural contours and undulations of the land to the greatest extent possible;
- (7) The proper site management techniques that will be followed during construction:
  - (a) BMPs shall be employed to avoid detrimental impacts to existing vegetation, soil compaction, and damage to root systems; and

- (b) The extent of a site exposed at any one time shall be limited through phasing of construction operations. Effective sequencing shall occur within the boundaries of natural drainage areas.
- (8) Protection of the site during construction through adequate erosion and sedimentation controls:
- (a) Temporary or permanent diversions, berms, grassed waterways, special culverts, shoulder dikes or such other mechanical measures as are necessary may be required by the Planning Board to intercept and divert surface water runoff. Runoff flow shall not be routed through areas of protected vegetation or re-vegetated slopes and other areas. Temporary runoff from erosion and sedimentation controls shall be directed to BMP's such as vegetated swales. Retaining walls may be required where side slopes are steeper than a ratio of 2:1;
  - (b) Erosion and sedimentation controls shall be constructed in accordance with the Department of Environmental Protection Stormwater Guidance manual;
  - (c) Erosion control measures shall include the use of erosion control matting, silt fencing, hay bales, mulches, and/or temporary or permanent cover crops as may be most appropriate for the area. Erosion control measures damaged from heavy rainfalls, severe storms, and construction activity shall be repaired immediately;
  - (d) Erosion control matting or mulch shall be anchored where:
    - [1] Plantings are on areas subject to mulch removal by wind or water flows
    - [2] Where side slopes are steeper than 2:1 or exceed 10 feet in height.
    - [3] During the months of October through March when seeding and sodding may be impractical, anchored mulch may be applied at the Planning Board's discretion.
  - (e) Runoff from impervious surfaces shall be recharged on the site by stormwater infiltration basins, vegetated swales, constructed wetlands, rain gardens, or similar systems covered with natural vegetation. Runoff shall not be discharged directly to rivers, streams, or other surface water bodies. Dry wells shall be used only where other methods are not feasible. All such basins and wells shall be preceded by oil, grease, and sediment traps. The mouths of all catch basins shall be fitted with filter fabric during the entire construction process to minimize siltation or such basins shall be designed as temporary siltation basins with provisions made for final cleaning; and
- (9) Re-vegetate the site immediately after grading:
- (a) Proper re-vegetation techniques shall be employed using native plant species, proper seed bed preparation, fertilizer and mulching to protect germinating plants. Re-vegetation shall occur on cleared sites within seven (7) calendar days of final grading and shall occur during the planting season appropriate to the selected plant species;
  - (b) A minimum of 4 inches of topsoil shall be placed on all areas subject to land disturbance which are proposed to be planted; and

- (c) Finished grade shall be no higher than the trunk flare(s) of trees to be retained. If a grade change of 6 inches or more at the base of the tree is proposed, a retaining wall or tree well may be required.

#### **I. Monitoring and Inspections**

- (1) After installation of barriers around preserved areas and construction of all structural erosion and sedimentation controls, an initial site inspection and approval, by the Planning Board's designee, of erosion and sedimentation controls and placement of tree protection measures shall occur. This inspection shall occur before any clearing or grading has begun;
- (2) Routine inspections during the period of construction and remediation, by the Planning Board's designee of preserved areas and erosion and sedimentation controls shall be made at varying intervals depending on the extent of site alteration and the frequency and intensity of rainfall;
- (3) Effective stabilization of re-vegetated areas must be approved by the Planning Board's designee before erosion and sedimentation controls are removed. The Planning Board designee shall complete an inspection prior to removal of erosion and sedimentation controls; and
- (4) The applicant shall be required to conduct weekly inspections of all erosion and sedimentation control measures on the site during the period of construction and during remediation to ensure that they are properly functioning as well as to conduct inspections following any storm that totals one (1) inch of rain within a 24-hour period.

#### **J. Appeal of Permit**

Any person aggrieved by the decision of the Planning Board, whether or not previously a party to the preceding, may appeal the decision in accordance with Massachusetts General Laws Chapter 40, Section 17.

#### **K. Enforcement**

- (1) This Section shall be administered by the Planning Board and enforced by the Town's Zoning Enforcement Officer who shall take appropriate action in the name of the Town of Harvard to prevent, correct, restrain, or abate violations of thereof. Each day that any violation continues is a separate offense. Violators shall be subject to a fine not exceeding \$300 for each offense; and
- (2) The Town's Zoning Enforcement Officer may post the site with a Stop Work order directing that all site disturbances in violation of this Section cease immediately. The issuance of a Stop Work order may include remediation or other requirements which must be met before construction activities may resume. No person shall continue working in an area covered by a Stop Work order, except work required correcting an imminent safety hazard as directed by the Town.
